EDUCATION

Aurora University, Aurora, IL — August 2024 – May 2026

Bachelor of Science in Computer Science

GPA: 4.0

- Minor in Math and Philosophy

WORK EXPERIENCE

PromoterMotor / NourishCap, North Webster, IN — August 2025 – December 2025

Software Engineer Intern

- Automated internal workflows leveraging JavaScript, Node.js, and FFmpeg, reducing manual work for 5+ people
- Diagnosed and fixed 4 bugs in the backend systems, reducing downtime by 20%
- Optimized AI prompts to enhance output quality and consistency, reducing human review by 30%
- Wrote Python and BeautifulSoup scripts to collect and format data for outreach to increase users by 6%

INVOLVEMENT

Computer Science Association, Aurora University, Aurora, IL — September 2025 – May 2026

Treasurer

- Taught AI-assisted development, game development, and other programming concepts to 15+ people

PROJECTS

Capstone Project - React Native, React, Nativewind, TypeScript, SQLite

- Led development of an offline-first electronic medical records (EMR) system with a 3-member Agile team
- Designed a full-stack architecture synchronizing the state of patient and inventory data in a distributed system

Morrowind Potion Helper - JavaScript, Node.js, Express, Handlebars, HTML, CSS

- Built an interactive potion recipe web app using MVC, a REST backend, and Server-Side Rendering
- Leveraged LLMs to create boilerplate, test different approaches, and find bugs, reducing development time
- Tested end-to-end and across different browsers using Playwright and API using Postman

BigNum Arithmetic Library - C++

- Engineered an arbitrary-precision BigNum library with test-driven development practices
- Implemented optimized mathematical operations and data structures for large-number computation
- Developed automated unit tests covering overflow scenarios, edge cases, and algorithm correctness

Signature Automation Tool - JavaScript, Node.js, FFmpeg

- Built a tool to batch watermark and process 100+ images, reducing manual editing time by 90%
- Implemented asynchronous processing to improve throughput and minimize overall execution time

Student Grade Calculator - React, Vite, JavaScript, CSS

- Constructed a responsive grade calculator, enabling weighted grade computation across 30+ assignments
- Configured a CI/CD deployment pipeline with GitHub Actions and Azure Static Web Apps for builds and hosting

Open-Source Contributions

- Authored 2 merged PRs for a website using React, Next.js, and TypeScript, improving functionality and UI
- Wrote a thorough bug report and then fixed a crash for the Balatro mod Maximus

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, C++, Java, C#, Go, SQL, HTML, CSS
- Frameworks & Libraries: React, React Native, Node.js, Express, Tailwind CSS, Next.js
- Tools & Platforms: Git/GitHub, GitHub Actions, Azure, Postman, Playwright, JUnit, JIRA, Linux
- Core Competencies: Full Stack Development, REST APIs, Agile/Scrum, OOP, Data Structures & Algorithms
- Databases: SQLite, MongoDB, MySQL, PostgreSQL
